IN DAILY USE

WHAT IT IS

316 songs with keys, tempo and lyrics on every phone in the group, in a building where the connection drops. One self-contained page: nothing to install, no account, no monthly bill. The team can also add songs from inside the app instead of leaving it.

WHAT IT CHANGES

Opens offline, so it never fails in the moment it is needed

A working metronome and both vocal keys on every song

Contributions land straight in a spreadsheet, ready to paste

Python · HTML · Apps Script Web App

Juan E. Diaz R. · Aruba-based · Remote worldwide · alphaowl01@gmail.com

SOMETHING LIKE THIS, FOR YOUR WORK?

The interesting part is your version of the problem.

Tell me the workflow that costs you the most time or the most trust. I will tell you honestly whether a system fixes it.
