ONE CONNECTED OPERATING SYSTEM

Knowledge, execution, and delivery stay in sync.

The system joins a local AI workspace, a structured knowledge vault, phone synchronization, scheduled overnight execution, and agent delivery. Each layer can be replaced without losing the operating model.

Built end to end. Used by other people.

I work where software, data, and operations meet: understanding the real workflow, building the system, and proving that the result is usable.

01

INSTRUMENT DESIGN

Team capability measurement

A 40-item measurement instrument across seven areas for a volunteer-run nonprofit, deployed as a reproducible generated form, turning 25 anonymous responses into decisions leadership could act on.

25 respondents · 7 areas measured

Apps Script / R Markdown / rating scales

02

SHIPPED PRODUCT

Corario

A single self-contained page a volunteer team uses on their phones offline, with an in-app contribution panel that writes straight to a spreadsheet backend.

Live · 316 songs · public URL

Python / HTML / Apps Script Web App

03

DATA ENGINEERING

Nonprofit financial reporting

A hand-kept ledger with no year column and out-of-order entries, turned into a reconciled, print-clean interactive report where no transaction is silently dropped.

Balance reconciled to 0.01

R Markdown / plotly / DT

04

DATA PRODUCTION

Statistical publication engineering

A recurring seventeen-page statistical publication produced end to end from one script, proved by reproducing the previously published edition word for word and number for number.

17 pages · prior edition reproduced exactly

R / SPSS / parameterised reporting

REPRESENTATIVE ANONYMIZED OUTPUT

Data quality that explains itself.

An 11-section R Markdown monitoring system turns more than 270,000 monthly records into 16 visual checks and plain-language findings for non-technical reviewers.

Monthly quality review

11 / 11 checks complete

Completeness	99.2%
Consistency	97.8%
Review queue	24 flags

FINDING 03

A small cluster requires review. The affected records, rule, and recommended action are included in the output.

AVAILABLE FOR REMOTE AND INTERNATIONAL WORK

Bring me the workflow nobody has been able to untangle.
